

Privacy Policy

Effective date: March 10, 2026

Overview

This privacy policy describes how the GA4 DevTools Trckr Chrome extension handles data.

Data Collection

The extension does not collect, transmit, or sell personal data. It only reads network requests in the local DevTools session to display analytics and pixel events to the user.

Data Use

Data is used solely to render the event list and summary inside the DevTools panel. No data is stored on external servers.

Data Sharing

No data is shared with third parties.

Data Storage

Events are displayed in memory during the current DevTools session and are cleared when the panel is closed or the user clicks "CLEAR LOGS".

Permissions

The extension uses the 'webRequest' permission to observe network requests in DevTools so that it can identify analytics and marketing pixel calls. It does not block or modify requests.

Remote Code

The extension does not load or execute remote code. All scripts are packaged locally with the extension.

Children's Privacy

This extension is not directed to children and does not knowingly collect personal information.

Changes

If this policy changes, the updated version will be published with the extension update.

Contact

For questions or concerns, contact the developer using the email address listed in the Chrome Web Store listing or the repository's issue tracker.
